AIM Industrial Inc.  **CHECK OUT OUR WEBSITE**
www.aimindustrial.ca

AIM Industrial Inc. provides everything from plant maintenance and manpower support, to safety upgrades, to complete turnkey process installations, machinery moving, fabrication, expansions and relocations.

About Us. Our Company. Your Service Provider!

■ Incorporated in 2008, AIM Industrial is a Full Service, Multi-Trade contractor with the following in-house services: millwrighting, rigging, iron work, electrical, mechanical, sheet metal, HVAC service contracts, TSSA piping, and fabrication. As specialists in turnkey machinery/equipment installations, maintenance and repairs for numerous business sectors, AIM is here to assist 24/7 - whether it be a small repair job during production hours, or a shutdown turnkey replacement project of a full assembly line. AIM Industrial is a genuinely connected company with great chemistry.

Our growth has been strategic yet constant in order to avoid thin and inconsistent service. Our excellence and success is derived from each and every employee's skill and contribution. We focus on what we do best and have a strong network of skilled, professional and certified support. That has led to AIM Industrial being chosen as Toyota Canada's #1 Rated "General (turnkey) Contractor" spanning majority of years from fiscal 2016 and into 2021, where we met or exceeded expectations on:

Safety, Supervision, Quality, Schedule and Cost.

It takes a true Team effort to achieve such an honorable status. Meeting or Exceeding in those five categories is our Mission Statement to all of our customers. That, is what we are most proud of and these are the benefits your company will be receiving from AIM!

A company is only as strong as the Team which, includes its' Leadership. The AIM Team, with its vast years of combined experience, is always here to help.

100%

Focused on Customer satisfaction, complete trade coverage and continual improvement as we move into the future.

“

We have been working with AIM Industrial for about 7 years now. During that time, we have found them to be a very professional company and extremely accommodating. They have high quality employees and will continue to be our main resource for Maintenance Support, Fabrication and Electrical Contracting.

Our experience with AIM has been outstanding. They're dependable and we get excellent service consistently. They've been a great long-term resource and are very supportive of our needs. It would be much more difficult to meet our customers' needs if we didn't have AIM as a partner.

We have seen a significant decrease in downtime since we started utilizing AIM for Maintenance and Electrical needs. In our bakery, we have kept our downtime to a minimum due to your staff always answering the call and going beyond the call of duty, at all hours of the day and night. We have machines in our facility that cost thousands of dollars an hour in production input when they are down, therefore, AIM is not only the first place we call, they are the ONLY place we call to get our equipment back up and running quickly.

- Major Food Manufacturing plant in Brantford

”

AIM is well positioned to deliver its commitment to customer satisfaction, complete trade coverage and continual improvement as we move into the future.

We currently have over 200 certified tradespeople with a fleet of over 50 equipped service vehicles. Our facility is centrally located in Cambridge, consisting of 80,000 square feet of building including: an in-house sheet metal

fabrication shop, a custom miscellaneous metals fabrication shop, a pipe fabrication shop, an equipment assembly shop, sales shop, a custom machine shop, a tool & equipment shop, and an in-house vehicle repair shop.

We look forward to working with you on any future project of any size...from large to small in scope. Let us know if you require our trades rates or would like a quotation on any upcoming work.

29 Cherry Blossom Rd. Cambridge, ON, N3H 4R7
(519) 747-2255 - www.aimindustrial.ca - info@aimindustrial.ca

Safety and Certifications

■ Safety is our top priority. We have a dedicated IHSA certified trainer on staff. We provide job specific risk assessments and safe work plans. Our trades people are all fully trained to meet the needs of today's industrial leaders. AIM is a fully insured company with WSIB, private liability insurance, and bonding capabilities.

AIM Industrial Inc. was awarded Toyota Canada's prestigious "Supplier Award of Excellence" for fiscal 2015, 2016, 2017, 2019 and 2020.

AIM achieved this #1 rating through a Toyota Performance Report which bases the score on the following five categories:

Safety, Schedule, Supervision, Quality and Cost.

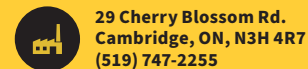

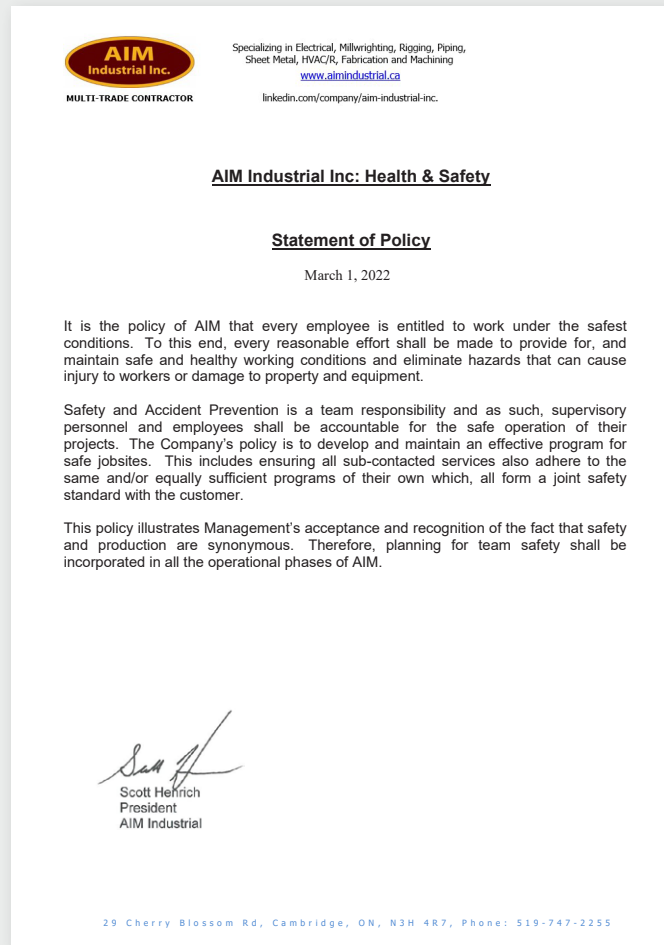

AIM Industrial Inc. scored "Meeting" or "Exceeding" in every single category. We are very proud of this as it truly reflects the strength and dedication of our Team. AIM extends this same level of service to any and all of our customers—regardless of industry!

Additional Training and Certifications:

AIM Industrial trades people are certified in their respective trades and have additional training and certifications such as:

- COR Applicant
- WHMIS
- GE Gas Turbine Training
- Working at Heights
- Rigging Certification
- Confined Space
- First Aid Training
- Elevated Work Platform
- ARC Flash Training
- Crane Operation
- AMP Certification
- Forklift Operation
- Cognibox Certification
- Fire Watch Training
- STOP Training
- IHSA Supervisor Training
- BROWZ Certified
- ISNetworld Certified
- Ariba Supply

Millwrighting Services

The Millwrighting Team has the capability, expertise and equipment required to safely complete plant relocations, equipment re-builds, upgrades, maintenance, repairs, and also workforce support for when you need a few more people

We own the common and specialized equipment required to handle all of your heavy equipment moves in a safe, efficient and competitive manner.

Our depth of technical expertise in the industrial manufacturing market and process industries allows us to complete projects safely and professionally within schedule and budget. We offer reliable and prompt breakdown and maintenance service 24 hours a day, 7 days a week with our experienced, qualified tradespeople supported by a service related management team.

Services

- Process line and equipment maintenance, repair, upgrades, additions, turnkey installations
- Maintenance and vacation labour support
- Specializing in Food, Beverage and Pharmaceutical process equipment installation and maintenance.
- Complete plant relocations, decommissioning and demolition
- Presses: stamping, injection mold, thermoforming, extruder installation, maintenance, break-down service and relocation
- Conveyor installation, repair and upgrades
- Precision alignment and leveling
- Safety guarding fabrication, installation and modification
- Robot turnkey installation and maintenance
- Machinery moving, off-loading and placement
- Specialized and heavy rigging
- Specialized transport
- Crane work
- Skidding and packaging
- Oversized fork-truck supply and operation
- PSHSR

This Slat Conveyor: AIM designed, fabricated in our shop, and installed for moving cars at a Tier 1 Automotive manufacturer. Broken up into two sections - the total length is 300 ft with a return length of 600ft. Cars will be driven onto this conveyor and transferred through the plant. AIM Industrial trades included: Fabrication, Millwright & Rigging, Electrical and Piping.

The weld-water cooling tower designed, procured and fabricated by AIM, consists of a pre-engineered building with sump system and internal stainless holding tank, 3 main pumps and one recirculation pump, cooling tower (and cooling tower structural steel), along with integrated controls and automation. It is capable of 1600 gallons per minute servicing 340 robots in a weld-shop and maintaining operating temperatures within 8 degrees. The system operates with a dual cell cross-flow cooling tower, complete with a 12,000 gallon stainless tank reservoir and a side stream filtration system. This pre-tested unit was the first of three shipped and installed in Alabama, U.S.A.

www.aimindustrial.ca

Modular Buildings/ Pump Skids/Power Centres

AIM Industrial has the skills and experience to design and fabricate modular plants to meet your specific standards and preferences, including preferred suppliers - providing a customized plant with components that are familiar to your operators and maintenance personnel. Applying our expertise to scale-appropriate solutions for pilot plants and demonstration plants reduces your project cost and schedule as well as promotes reliable operation, easier maintenance, and versatility of your modular system.

Our industry-leading experience and capabilities range from single module turnkey laboratory scale systems to multi-modular small commercial plants. AIM also has extensive experience retrofitting Sea Cans for Modular Process Systems.

Services

- Water Pumping Buildings
- Industrial Process Pump Skids and Cooling Towers
- Modular Buildings for all equipment requirements
- Switch Gear and Power Enclosures
- Engineering and Design
- Equipment Selection and Sourcing
- In-House Construction including Modular Building & Base Frame/Structural Fabrication – CWB Certified
- Onsite Start-up & Commissioning Support
- Ready to work with the customer to achieve local building code compliance

Automation, 3D Printing and Machine Shop Services

With today's technology reaching new heights to move greater volumes faster, more cost-effective and safer - Automation, Custom Machining and even 3D printing are all the norm in the manufacturing industry. AIM Industrial's commitment to our customers is that we will assist in every way possible. Our in house Automation and Machining can handle many possibilities. With an excellent network of professionals, we are able to get complimenting support to solve your problems or visions. Our 3D Printing capabilities come with excellent knowledge and training.

Services

- Line synchronization and integration
- Installation & integration of Robotic systems
- Re-tool lines for consolidation of SKU's 3D Printing and rapid prototyping
- Machining and spare parts supply
- 3D Mechanical design and equipment concept generation
- Machine MTTR/Reliability/Spare Parts cost reduction investigations
- Automated tooling from concept to Install and troubleshooting
- Process Jig/fixture design, modification, and manufacturing
- Plant and equipment layouts with creation of 2D/3D file formats

Automotive Services

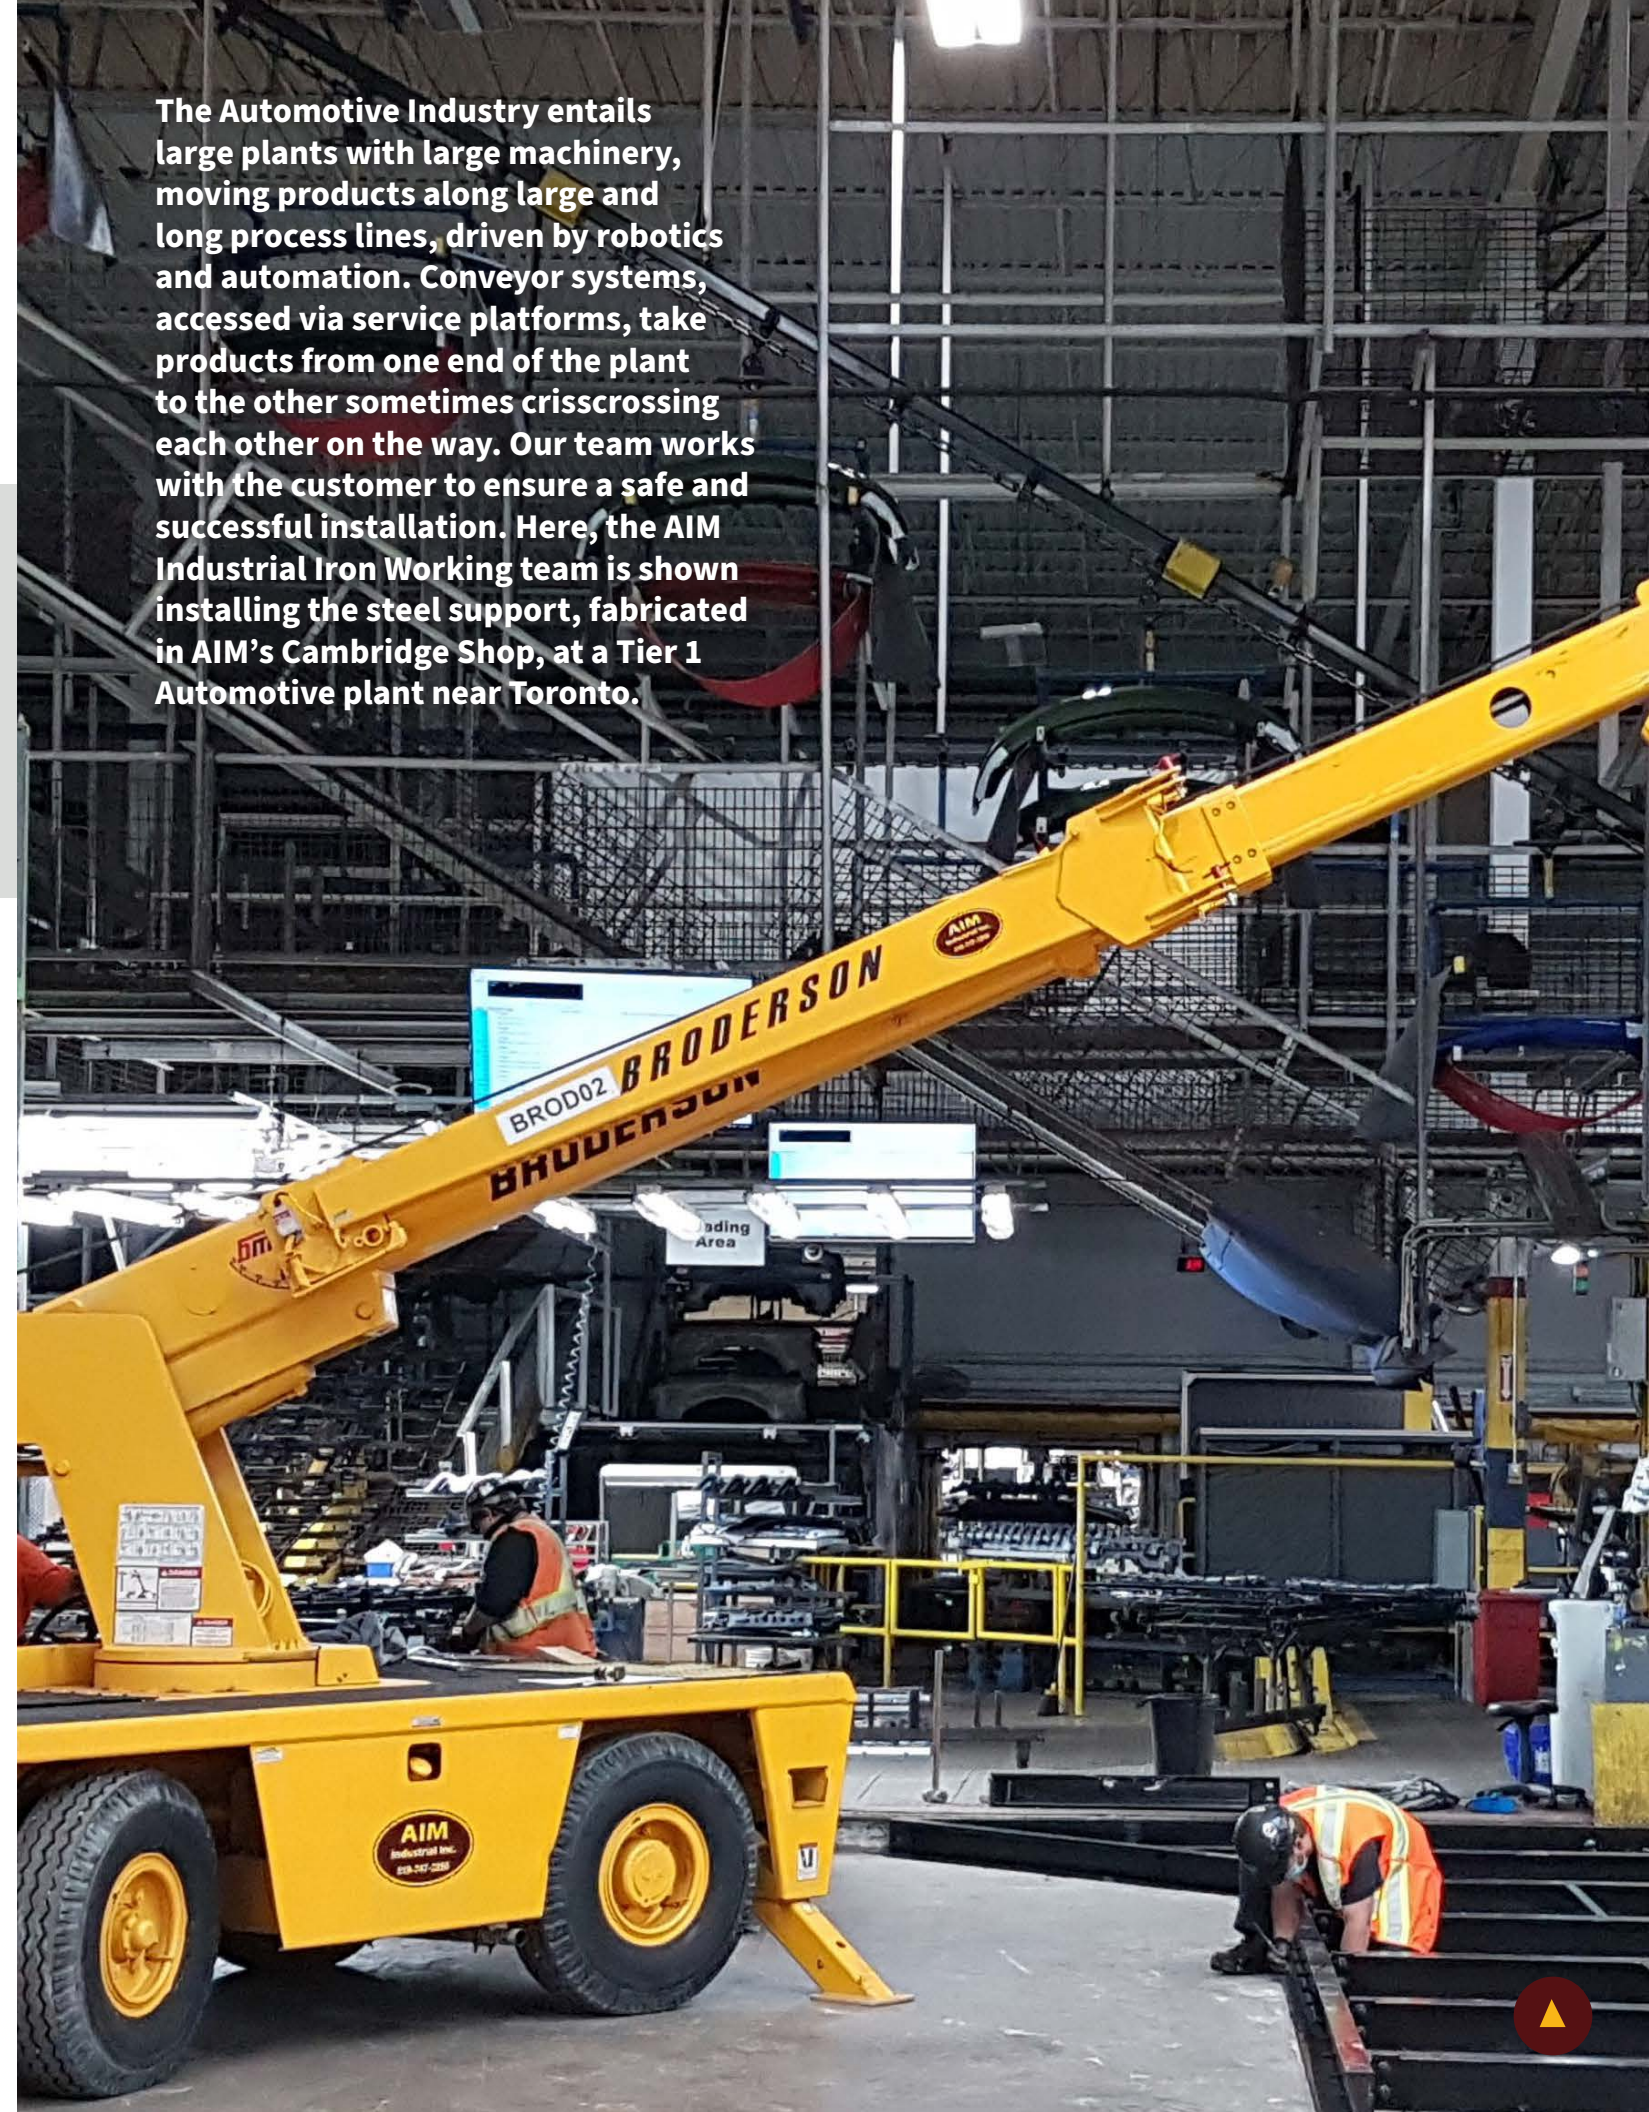

AIM Industrial's tradespeople, have helped define, not only what a skilled worker is, but also what 24-hour breakdown service means. With an ongoing and growing presence in the Automotive industry, performing trade work from press and conveyor systems, to both paint and weld shops, to team rooms, chiller rooms as well as HVAC/R response - these are the in-house services that have made us into the highly reputable company that we are today.

AIM performs work in ways that has led us to being rated and recognized by Toyota Canada, since 2015, over multiple fiscal years, to be their #1 Rated Supplier in a General Contractor role - able to run complete and turnkey projects where we met or exceeded expectations in numerous categories.

Services

- We have serviced and installed numerous Multi-Trade Turnkey Installations and Relocations related to the industry at facilities such as:
- Multiple Tier Level manufacturers
- Major OEM (Original Equipment Manufacturers)
- On-site satellite office presence
- Our skilled team has experience servicing and installing many types of machinery including:
 - All sizes and styles of Steel Forming and Stamping Presses
 - All sizes of Plastic, Polymer, Aluminum: Injection Mold, Blow and Thermoforming, Extrusion, and other styles of Presses
 - Robotics, Conveyors, Carriage systems, Assembly Lines, Tooling, Weld Shop, Paint Shop, Team Rooms, Superfinishers, Welding Machines, Structural Upgrades, Miscellaneous Metals/Mezzanines, and more...
- Prototype design assistance and manufacturing/fabrication
- Continuously rated among the top contractors for Toyota Canada
- EV Industry re-tooling and MRO
- Labor and vacation support

The Automotive Industry entails large plants with large machinery, moving products along large and long process lines, driven by robotics and automation. Conveyor systems, accessed via service platforms, take products from one end of the plant to the other sometimes crisscrossing each other on the way. Our team works with the customer to ensure a safe and successful installation. Here, the AIM Industrial Iron Working team is shown installing the steel support, fabricated in AIM's Cambridge Shop, at a Tier 1 Automotive plant near Toronto.

Plastics and Aluminum Services

Servicing the platen on a large IMM

With today's ever-changing mandates on plastic use leading to retooling of many processes, AIM Industrial is well-positioned to assist your company with Maintenance, Repair and Operations (MRO) of many types of machinery related to both the Plastics and Aluminum industries.

From having installed complete turnkey 2500T Extruder systems, to relocating large Injection Mold Machines for the plastics industry, and then maintaining those systems - our team is here to help keep your production running efficiently and cost effectively.

Turnkey installation by AIM Industrial

Services

- Small to very large Injection Mold Machines (IMMs)
- Various types and sizes of Extrusion Machines
- Thermoforming, Blow Molding, Roto molding, Compounding, and Recycling
- AIM has provided service and/or installed at/for several other Plastics, Aluminum Press and Thermoforming manufacturers such as: UBE/Mitsubishi, Krauss Maffei, JSW, Husky, Van Dorn Demag, Granco Clark, Milacron and more.
- Daily labor support for shift coverage, sickness and vacation support
- Maintenance, Repair, Operations (MRO) support to many customers
- Turnkey demolition, installations and relocation services
- Trouble-shooting
- Re-tooling

Cement, Aggregate and Mining Services

AIM Industrial's skilled tradespeople have been actively involved in the cement, aggregate and mining industries for over 30 years. Our experience has come from working on hundreds if not thousands of small jobs and large projects in these particular industries. Whether it's ramping up and completing seasonal shutdowns where dozens of tradespeople from all trades come together to perform upgrades and installations, to having in house management teams on site to help plan with our customers, to going into underground mines servicing all the machinery and equipment bent in these harsh environments - we know it well.

Looking at the list below, you can see a complex assortment of projects AIM has performed. It is through this work that we are proud of the excellent reputation we have achieved within these industries. AIM Industrial is here to assist with whatever part of your company's process operations you deem fit.

Services

- Labor support for maintenance, vacations and health related times
- Sheet Metal fume extraction hoods and ducting
- Stack and Aspiration fabrication and installation
- Custom catwalk/ladders/platforms for maintenance access
- Kiln replacement and demolition, cooling system, (kiln outlet)
- Kiln lance replacement, inlet rebuild, shell demolition and inching gear maintenance
- Cooler maintenance, rebuilding, and replacements
- Rod mill rebuild, bearings, gears and wear plates
- Baghouse, heat exchanger, repairs and installations
- Fan/blower repairs and installations
- Chute and hopper rebuilds/replacements
- Conveyor installation, rebuilds and maintenance
- Structural steel and Safety Guarding

Plant Expansion and Relocation Services

As a Multi-Trade Contractor, AIM industrial's Tradespeople and Management have over 30 years of experience with factory moves, equipment and machine relocation projects, including full turnkey factory relocations. From Tank Farms to Assembly Lines, from Heavy-duty Rigging jobs to delicate Electrical and Piping systems, from Plant Machinery Dismantling and Decommissioning, then shipping them to a new site—sometimes to a different country halfway across the world—we have the necessary experience to complete these projects safely, successfully, and on budget.

Whether it's a Brownfield or Greenfield erection and installation, AIM Industrial is well-versed in working with General Contractors, Engineering firms, Municipalities and of course, the Customer, in order to bring what was once a vision, to reality.

Services

- CWB welding
- Process and equipment installations
- Complete plant relocations
- Presses: Stamping, Injection Mold, Extruder installation, maintenance, break-down service and relocation
- Conveyor installation and modifications
- Duct and sheet metal installation
- Safety guarding fabrication, installation and modification
- Plant demolition
- Robot installation and maintenance
- Machinery moving
- Specialized and heavy rigging
- Structural reinforcing
- Steel erection
- In-plant mezzanine, catwalk, stair and handrail installation
- Specialized transport
- Machinery off-loading and placement
- Crane work
- Skidding and packaging
- Oversized fork-truck supply and operation
- PSHSR

Emerging Markets, Hydrogen and Renewable Energy

In today's world there is an ever-increasing desire to discover and create new ways of energy sources. From wind power to harnessing the sun's energy via solar panel farms or photo-voltaic cells, to new hydrogen sources or bioresins, from recycling to biomass and more, AIM Industrial has a vast experience level to assist your company's needs with the in house trades you've seen on our website.

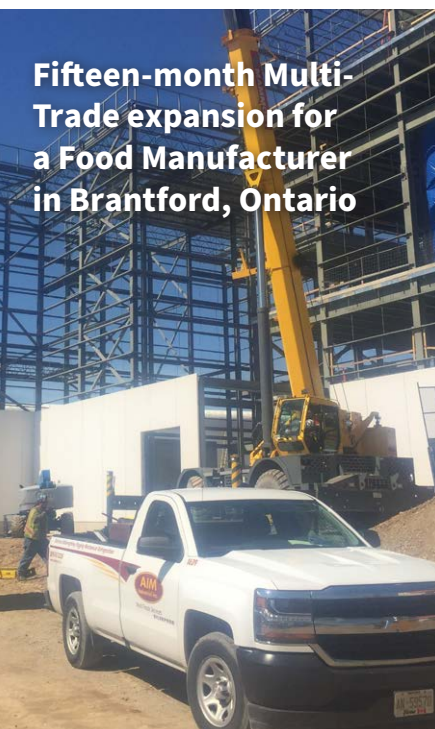

We incorporate a highly reputable network of professional engineers, design teams, and suppliers to ensure what AIM Industrial delivers to our customers, meets or exceeds the desired end-product safely, effectively and cost efficiently. For years, AIM Industrial has been working in conjunction with General Contractors and Customers to provide you the best service possible.

Services

- Solar power, bioenergy, wind power, hydroelectric, hydrogen, recycling support, installation and repair
- Large engineered projects estimated and managed
- Sheet Metal and HVAC/R mro and project work
- Mechanical/Piping modifications, additions, complete system installation
- Electrical power upgrades, trouble-shooting and thermal imaging
- Machinery installation, commissioning, modifying and maintenance
- Shift coverage and other manpower support
- Automation support and retrofitting
- Turnkey fabrication and installation projects
- Modular building/Sea Can fabrications and modifications and installation
- Assisting customer in energy audits
